EXPERIENCE

Virtual Internship

Frontend Simplified | Colorado Springs, CO

Sep 2025

<https://frontendsimplified.com/>

- Transformed a completely static HTML, CSS, JavaScript, and React single page applications into an interactive user interface using animations, transitions, and carousels.
- Processed API requests to dynamically represent data from a cloud server and represented it through skeleton loading states, pagination, and dynamic routing.
- Utilized Git version and control and the GitHub interface to work and thrive in a virtual and collaborative team environment.

PROJECTS

NFT Marketplace Model

solis-nft-marketplace.vercel.app

- Transformed a static React boilerplate application into an interactive user interface using animations, transitions, and carousels.
- Processed API requests to dynamically represent data from a back-end server
- Implemented skeleton loading states, pagination, and dynamic routing to improve user experience of API data
- Utilized Git version control and GitHub to work and thrive in a virtual and collaborative team environment adapting the boilerplate into a dynamic app

Library

<https://library-project-lkn5.vercel.app/>

- Designed and built a library app using basic frontend technologies similar to a bookstore website, focusing on React and HTML.
